Open to relocation within the EU and to remote roles across Europe | Requires work visa sponsorship in the EU

PROFILE

Senior QA Engineer with 5+ years across FinTech, AdTech and MedTech — from retail mobile banking to real-time bidding platforms handling up to 200K RPS. Specialising in backend and API testing of high-load distributed systems alongside mobile (iOS/Android) coverage. Experienced in test strategy, test automation, CI/CD integration, performance testing and leading QA teams of up to 9 engineers. Strong background in SQL/NoSQL databases, monitoring and debugging in production-like environments. Build QA processes from scratch, introduce documentation standards and quality metrics.

WORK EXPERIENCE

Senior QA Engineer — Expera — Jun 2026 – Present

Product: Retail mobile banking application (iOS/Android) for one of the largest banks in Uzbekistan. Payments and payment strategies, card and wallet transfers, QR operations, client-side anti-fraud layer. Microservice backend running in Kubernetes.

- Functional, integration, regression and end-to-end testing across mobile client and backend services.
- Test coverage design and test modelling, with risk assessment and prioritisation per release stream.
- Integration testing with third-party providers, including telecom anti-fraud solutions.
- REST API testing, mobile traffic interception and client-server debugging.
- Defect investigation through log aggregation, error monitoring and direct access to services in Kubernetes.
- Requirements and analytics review, catching defects at documentation stage (shift-left).
- Build acceptance and release verification on real iOS and Android devices.

Achievements:

- Built a unified test documentation structure for the product in Allure TestOps.
- Established regression coverage of core business flows, turning regression into a repeatable, managed process.
- Introduced mock-based isolation of external dependencies — testing no longer relies on third-party availability.
- Automated bulk export and import of test cases via the Allure TestOps REST API (Python), replacing manual transfer of hundreds of cases.

Technologies: Allure TestOps, Jira, Confluence, Android Studio, Xcode, TestFlight, Firebase, Proxyman, Postman, Swagger, WireMock, Kibana, Sentry, Kubernetes/Lens, PostgreSQL, GitLab CI, Git, Python.

QA Lead / Senior QA Engineer — Profit Family — Jul 2022 – May 2026

Product: Demand-Side Platform (DSP) processing up to 200K RPS for real-time ad bidding (RTB). Integrated with trackers, SSP and DMP.

- Functional, non-functional and load testing of high-load backend microservices.
- Defined testing strategies, risk analysis and SLA agreements.
- Wrote test documentation: test plans, checklists, bug reports.
- Controlled and optimised QA coverage; implemented shift-left testing.
- Automated regression and smoke testing (PyTest, Playwright, Allure).
- Managed and developed a QA team of 9 engineers: hiring, onboarding, training, delegation.
- Set up CI/CD automation and dashboards for QA metrics in Jira and Grafana.
- Collaborated with DevOps on environment stability and monitoring.

Achievements:

- Launched new products and markets: client cabinet, PUSH integrations, LATAM and EU campaigns.
- Reduced production incidents reaching the development team by introducing tier-2 support.
- Automated monitoring of business KPIs.
- Improved QA and release documentation standards; introduced a documentation review stage.
- Enhanced product security by rolling out 1Password and closing identified vulnerabilities.

Technologies: Postman, Insomnia, Swagger, PyTest, Playwright, Python, JavaScript (Jest), Docker, Git, Bash, cURL, PostgreSQL, ClickHouse, Redis, AeroSpike, Graylog, Grafana, BrowserStack, Allure TestOps, TestIT, AgileTest, k6, JMeter.

QA Engineer — MedCloud Integration Platform — Jan 2021 – Jun 2022

Product: Healthcare CRM integration platform (20K RPS), integrating EMR, HMS, LIS and PMS systems.

- Functional, integration and end-to-end testing of backend services and integrations.
- Writing and maintaining test documentation: test cases, checklists, bug reports.
- Regression and smoke testing.
- Exploratory testing and defect localisation using logs and proxies.
- Setting up and maintaining test environments.
- Assisted in onboarding new team members (2 QA engineers).

Achievements:

- Built the QA process from scratch in a Scrum team.
- Established a release management workflow.
- Improved test coverage and documentation standards.

Technologies: Postman, Swagger, Jira, Confluence, TestRail, MariaDB/MySQL, Charles Proxy, Git, Laravel logs.

SKILLS

Testing Types: Functional, Non-functional, Regression, Integration, End-to-End, Load, API (REST), Contract, Mobile (iOS/Android).

QA Practices: Test strategy, test design techniques, release test planning, risk-based testing, shift-left, Definition of Ready for testing, quality metrics, Go/No-Go recommendations, mentoring, autotest code review.

Automation: Python (PyTest, Playwright, Allure), JavaScript (Jest).

Mobile: Xcode, Android Studio, TestFlight, Firebase (App Distribution, Crashlytics), BrowserStack, device log analysis.

API & Traffic: Postman, Insomnia, Swagger, WireMock, Proxyman, Charles Proxy, Burp Suite.

Load Testing: k6, JMeter.

Databases: PostgreSQL, ClickHouse, Redis, AeroSpike, MySQL, MariaDB.

TMS & Tracking: Allure TestOps, TestIT, TestRail, AgileTest, Jira, Jira Service Desk, Confluence.

Monitoring & Logs: Kibana (ELK), Graylog, Grafana, Sentry.

Infrastructure: Docker, Kubernetes / Lens, GitLab CI, CI/CD pipelines, Git, Linux, Bash, SSH, cURL, DevTools.

EDUCATION & CERTIFICATIONS

Donetsk Academy of Management and Public Administration — Strategic International Business Management (Bachelor, 2021)

Key courses:

- JavaScript QA Engineer (OTUS, 2024)
- Performance Testing (OTUS, 2024)
- Continuous Integration (Hexlet, 2024)
- Docker Basics (Hexlet, 2024)
- REST API Automation with Postman (2023)
- Python Automated Testing (Hexlet, 2023)
- Google Crash Course on Python (Coursera, 2022)
- ISTQB Foundation Prep (Stepik, 2021)

LANGUAGES

Russian — Native | Ukrainian — C1 | English — B2 (Upper-Intermediate), improving

ADDITIONAL INFORMATION

Preferred contact: Telegram @ProQAzheny. Interested in both engineering and management tracks. Strong believer in process efficiency: "A few well-set processes bring more value than hundreds of ad-hoc tests."

Hobbies: photography, hiking and mountaineering, reading, strength training.
